

SIGER IS NOW RECOGNISED LIKE A SUCCESS PRODUCT

Monday, 10 December 2012

It's with great satisfaction that Algardata sees recognized one of the their recent projects – **SIGER-Integrated Waste Management System**, fully developed by Algardata to meet the environmental area needs, in terms of waste management, treatment and recovery of municipal solid waste.

Applies to all infrastructures that work within that area and who need to manage waste weighing, respecting the classification according to the **European Waste List**, whether they are **transfer stations, treatment plants, recycling centres and clinics**.

SIGER is an integrated system which ensures the **centralized administration of all information to the process inherent to the waste management**, since the weighting documents introductions in the entry, passing to the validations, until the integration in billing ERP and their outputs. Is transversal to all departments (Weigh stations, Back office, Monitoring, billing, etc), allowing the permanent work of all users on the same data and the introduction or alteration thereof by any user, with their permissions.

The architecture of functioning On-Line/Off-line accurate the permanent functioning of all the remote branch offices, even in situations of failure to communicate with the control unit and ensures the automatic synchronization of data with the control unit when the connection is reestablished.

The development of this product is based on recent technologies, which guarantee the customization and manipulation of data consulting by user, data exportation in several

formats (Excel, PDF, Word) as the extensibility of the system to new modules integration and peripherals.

Certified system according to the legal guidelines imposed by DGCI (*Direção Geral dos Impostos*).

On the past 1th December, was successfully concluded the second phase of the Siger Project in the TRATOLIXO partner, which expressed its recognition for the excellent design and support team, pointing to that in time all will identify the added value of this implementation.

[“Better efficiency and effectiveness with the 2nd phase conclusion of the Siger project”](#)

Origin: TRATOLIXO

If you are not yet our customer, take advantage of this opportunity to contact us and expose your project. We would be happy to be your technology partner. Contact us by email: comercial@algardata.pt
